

A Digital Companion for Urban Commuters

Redesigned for ease and speed — the Pune Metro App helps you plan, track, and ride with confidence, right from your phone.

Pune Metro

What is this product?

The Pune Metro App is your go-to digital companion for hassle-free urban travel.

Project Duration

User Research

Conducting interviews, surveys, and user observations to understand user needs, pain points, and expectations for the app.

1 Week

Paper Prototype

Creating low-fidelity paper prototypes to sketch out key app screens and flows, quickly iterating on layout and functionality ideas.

1 Week

High-Fidelity Screens & Prototype

Designing polished high-fidelity screens with visual assets, branding, and interactive elements, creating a functional prototype for user testing or demo.

2.5 Weeks

Problems faced

To begin the Pune Metro app redesign, I interviewed daily commuters, students, and tourists to understand their frustrations, needs, and expectations. These insights revealed key issues and shaped a more user-centric direction.

No. of people interviewed

Age Group

15 - 50

Method

Physical Interview

*"Buttons are small —
hard to tap on the go!"*

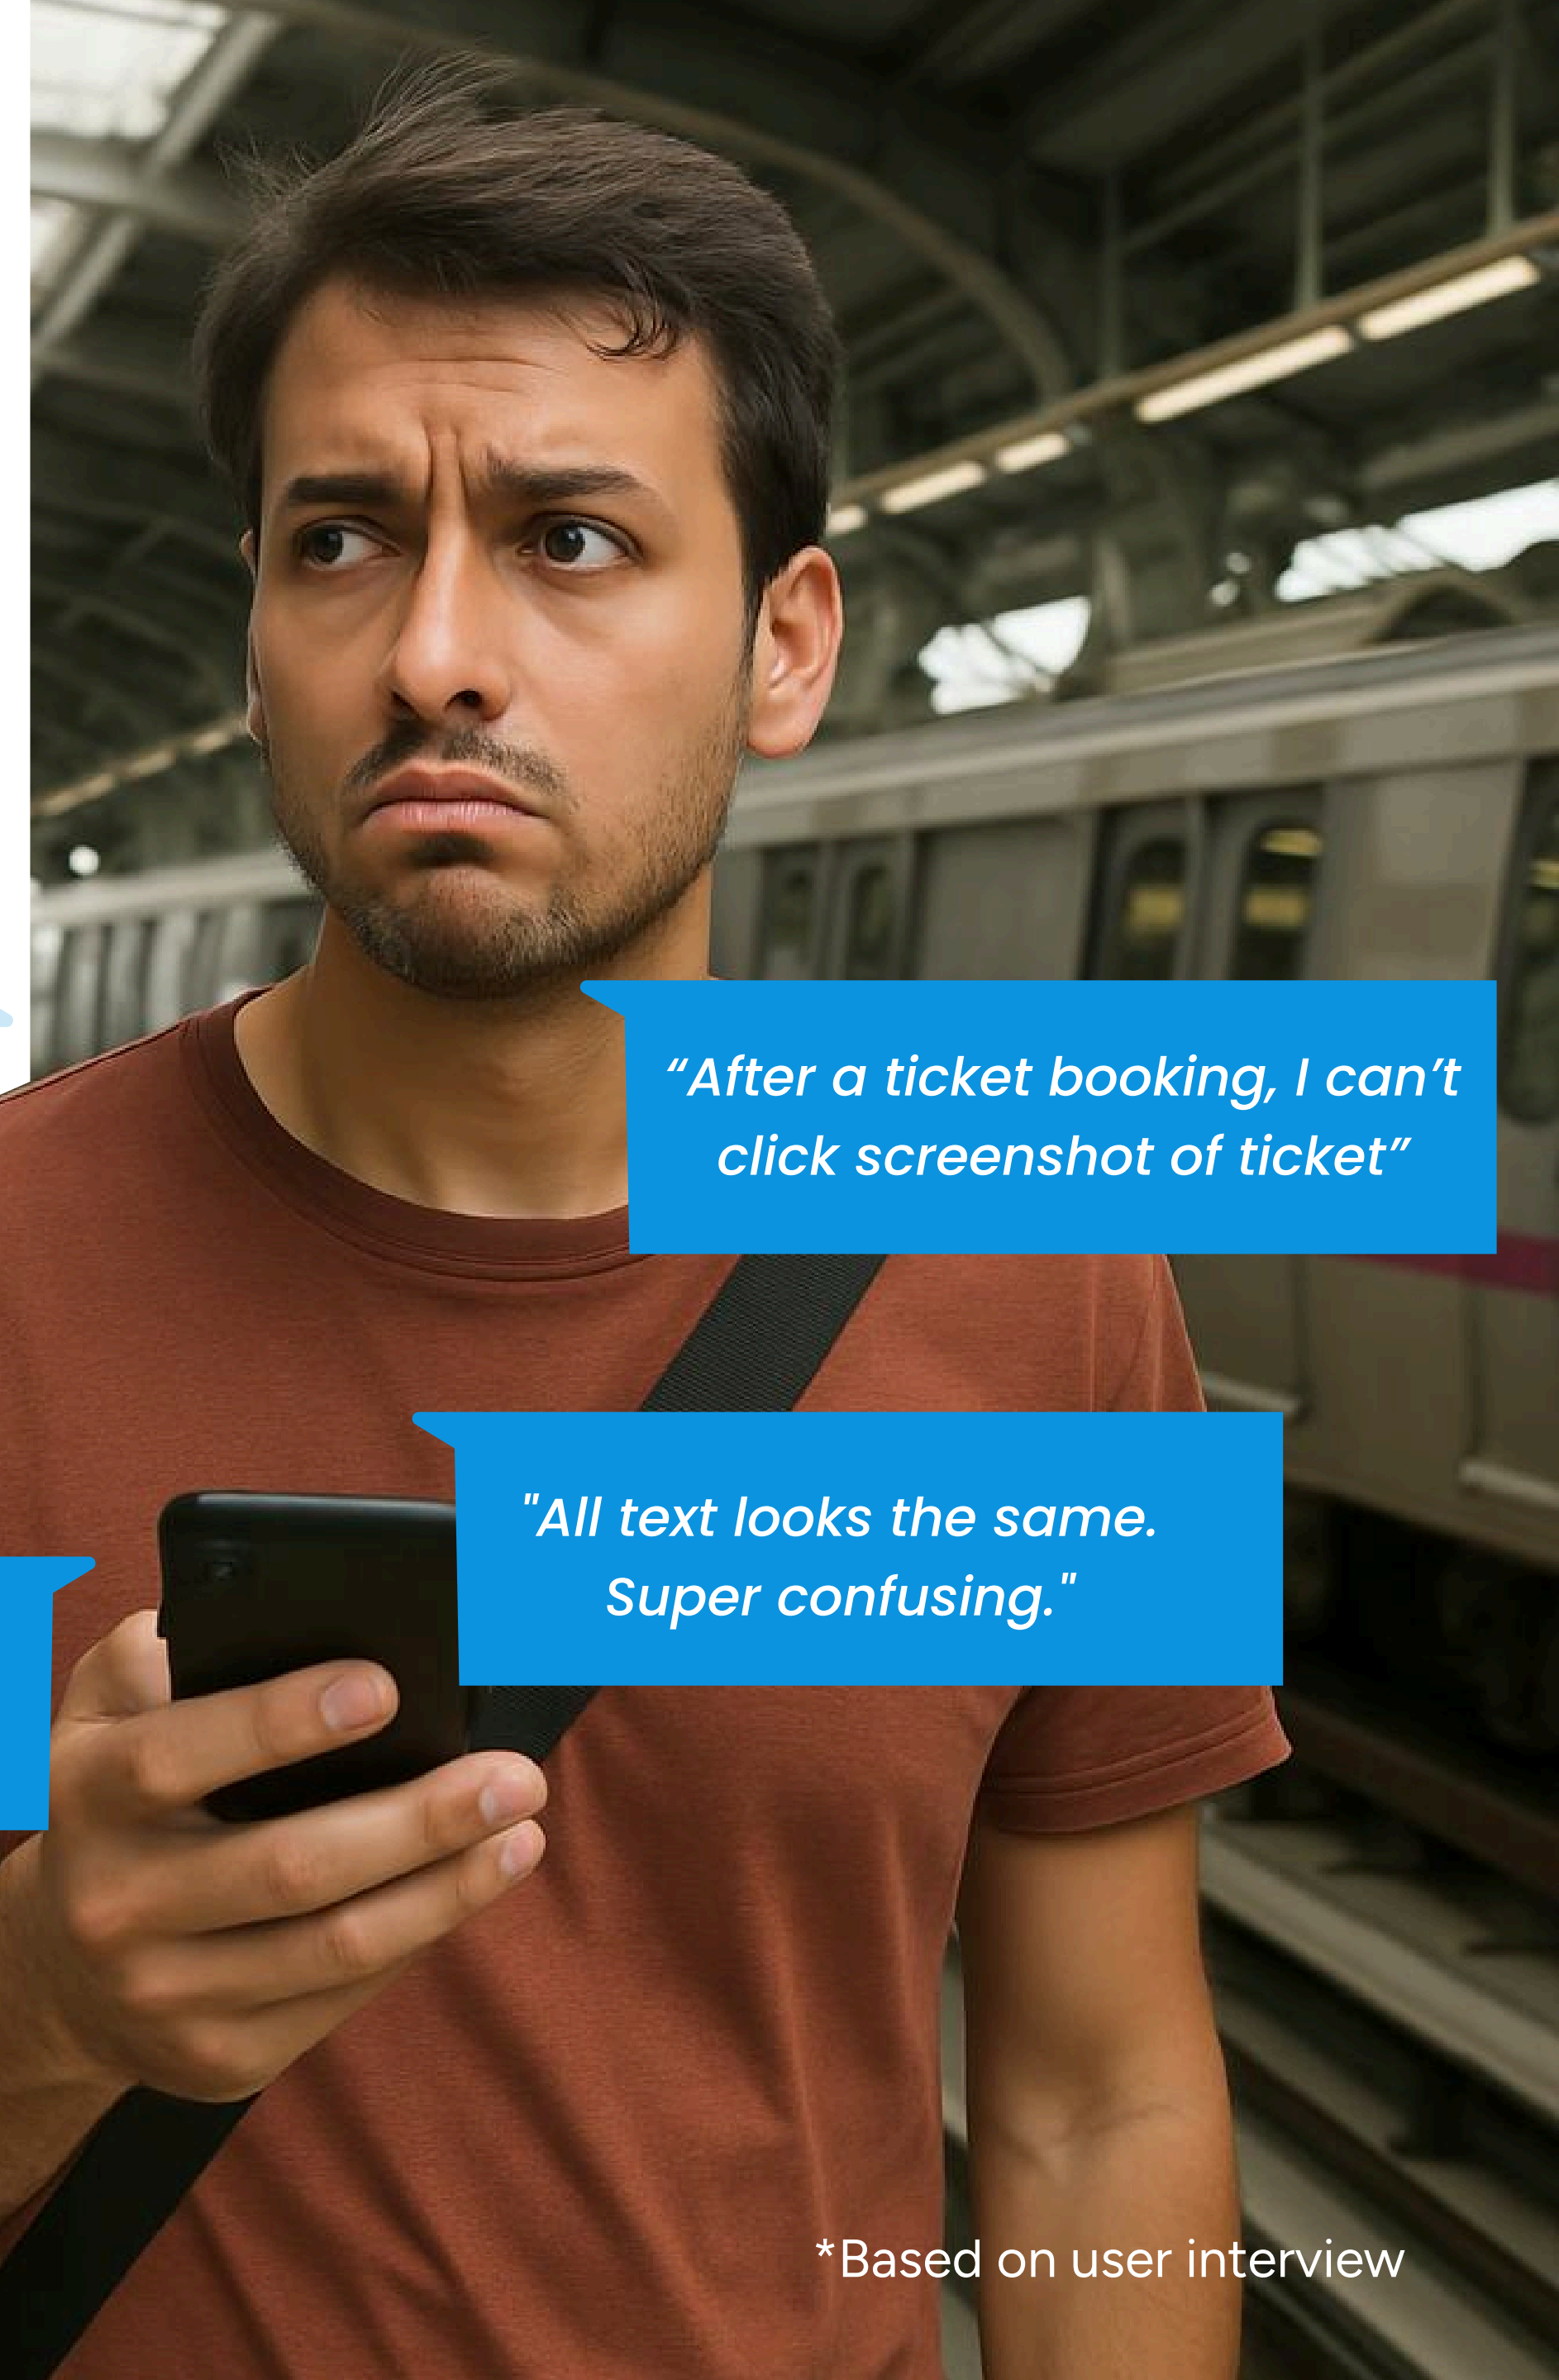

*"The app content layout is
complex to understand."*

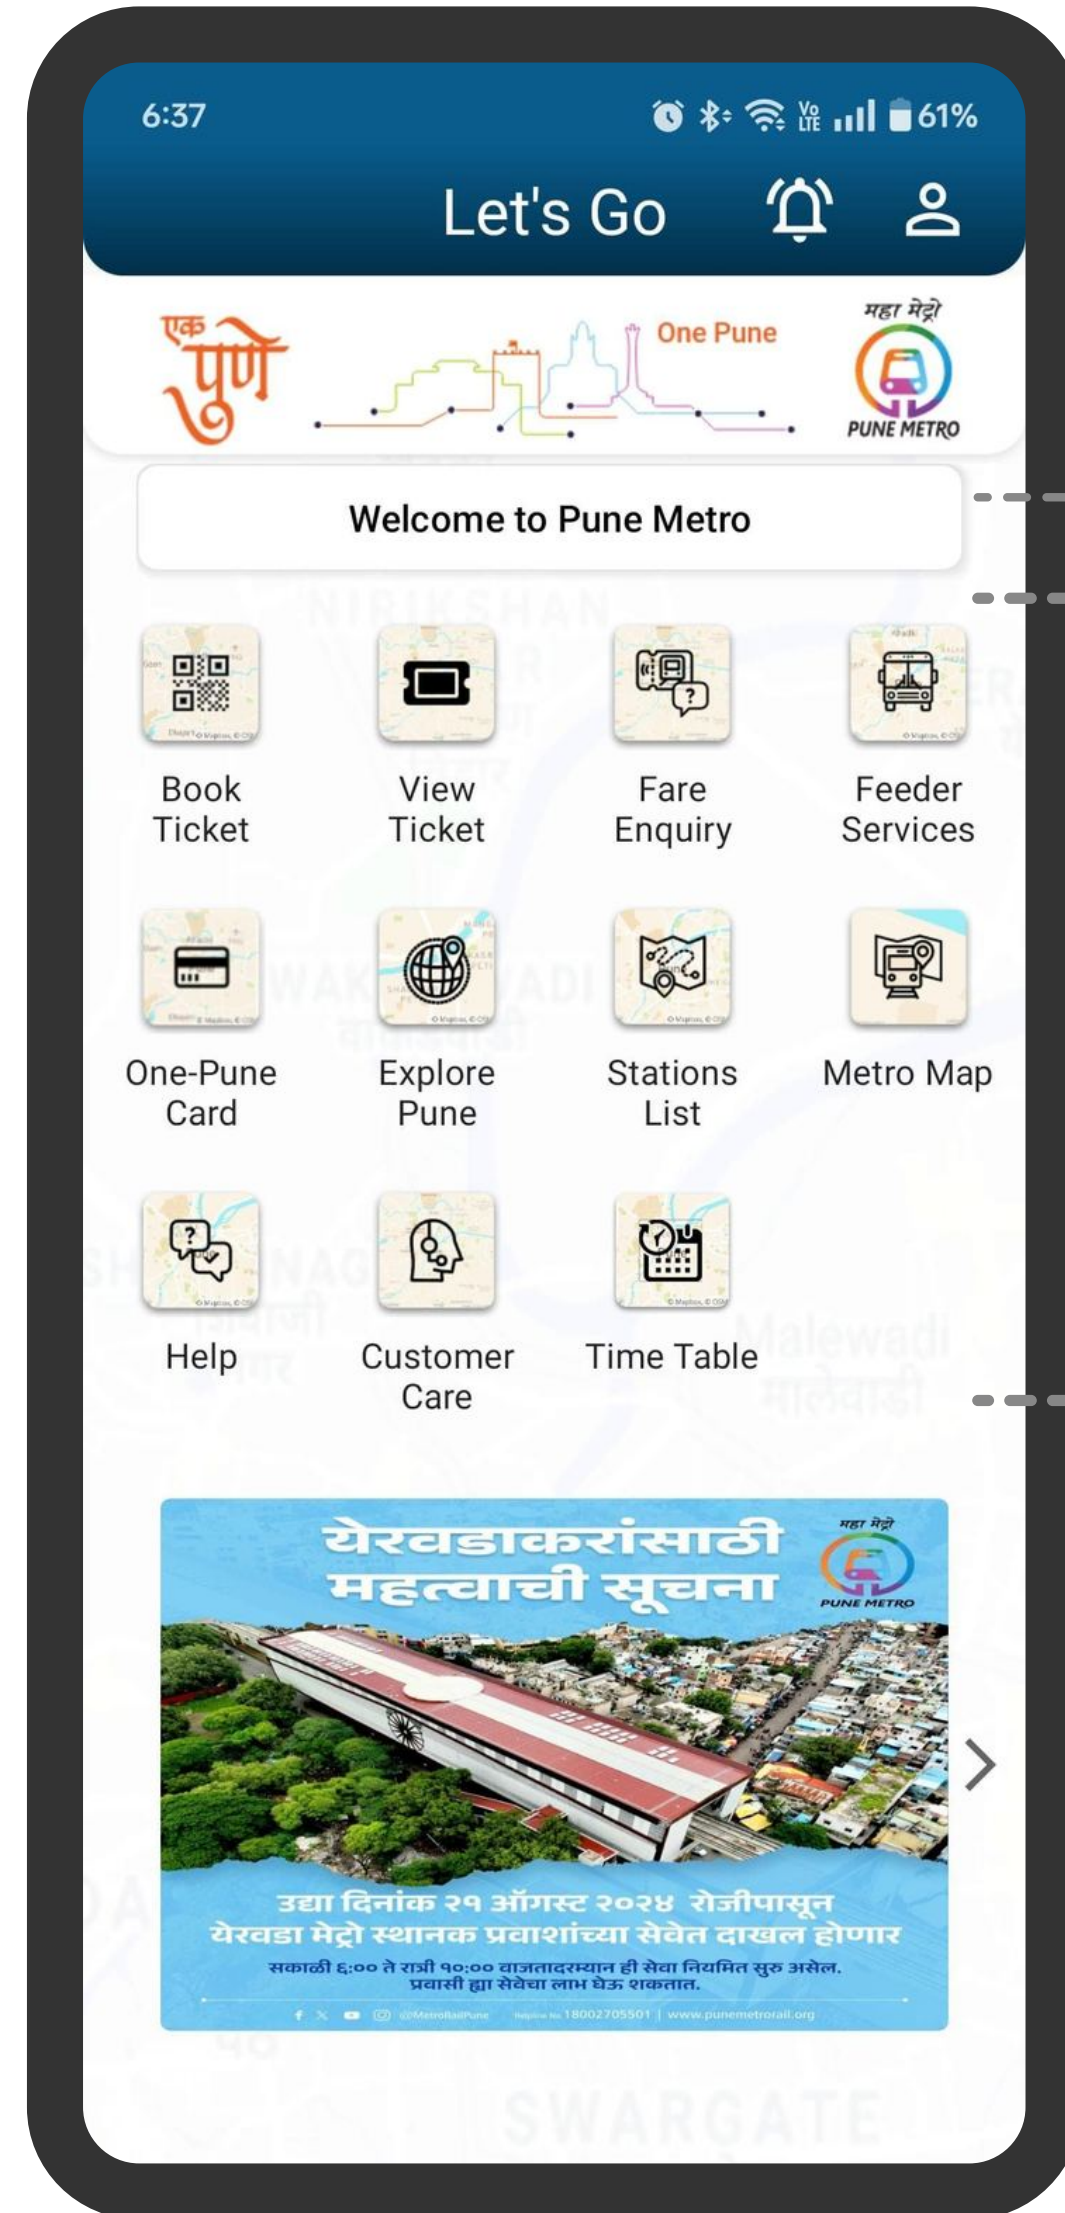

*"Why doesn't it save my
last route?"*

*"After a ticket booking, I can't
click screenshot of ticket"*

*"All text looks the same.
Super confusing."*

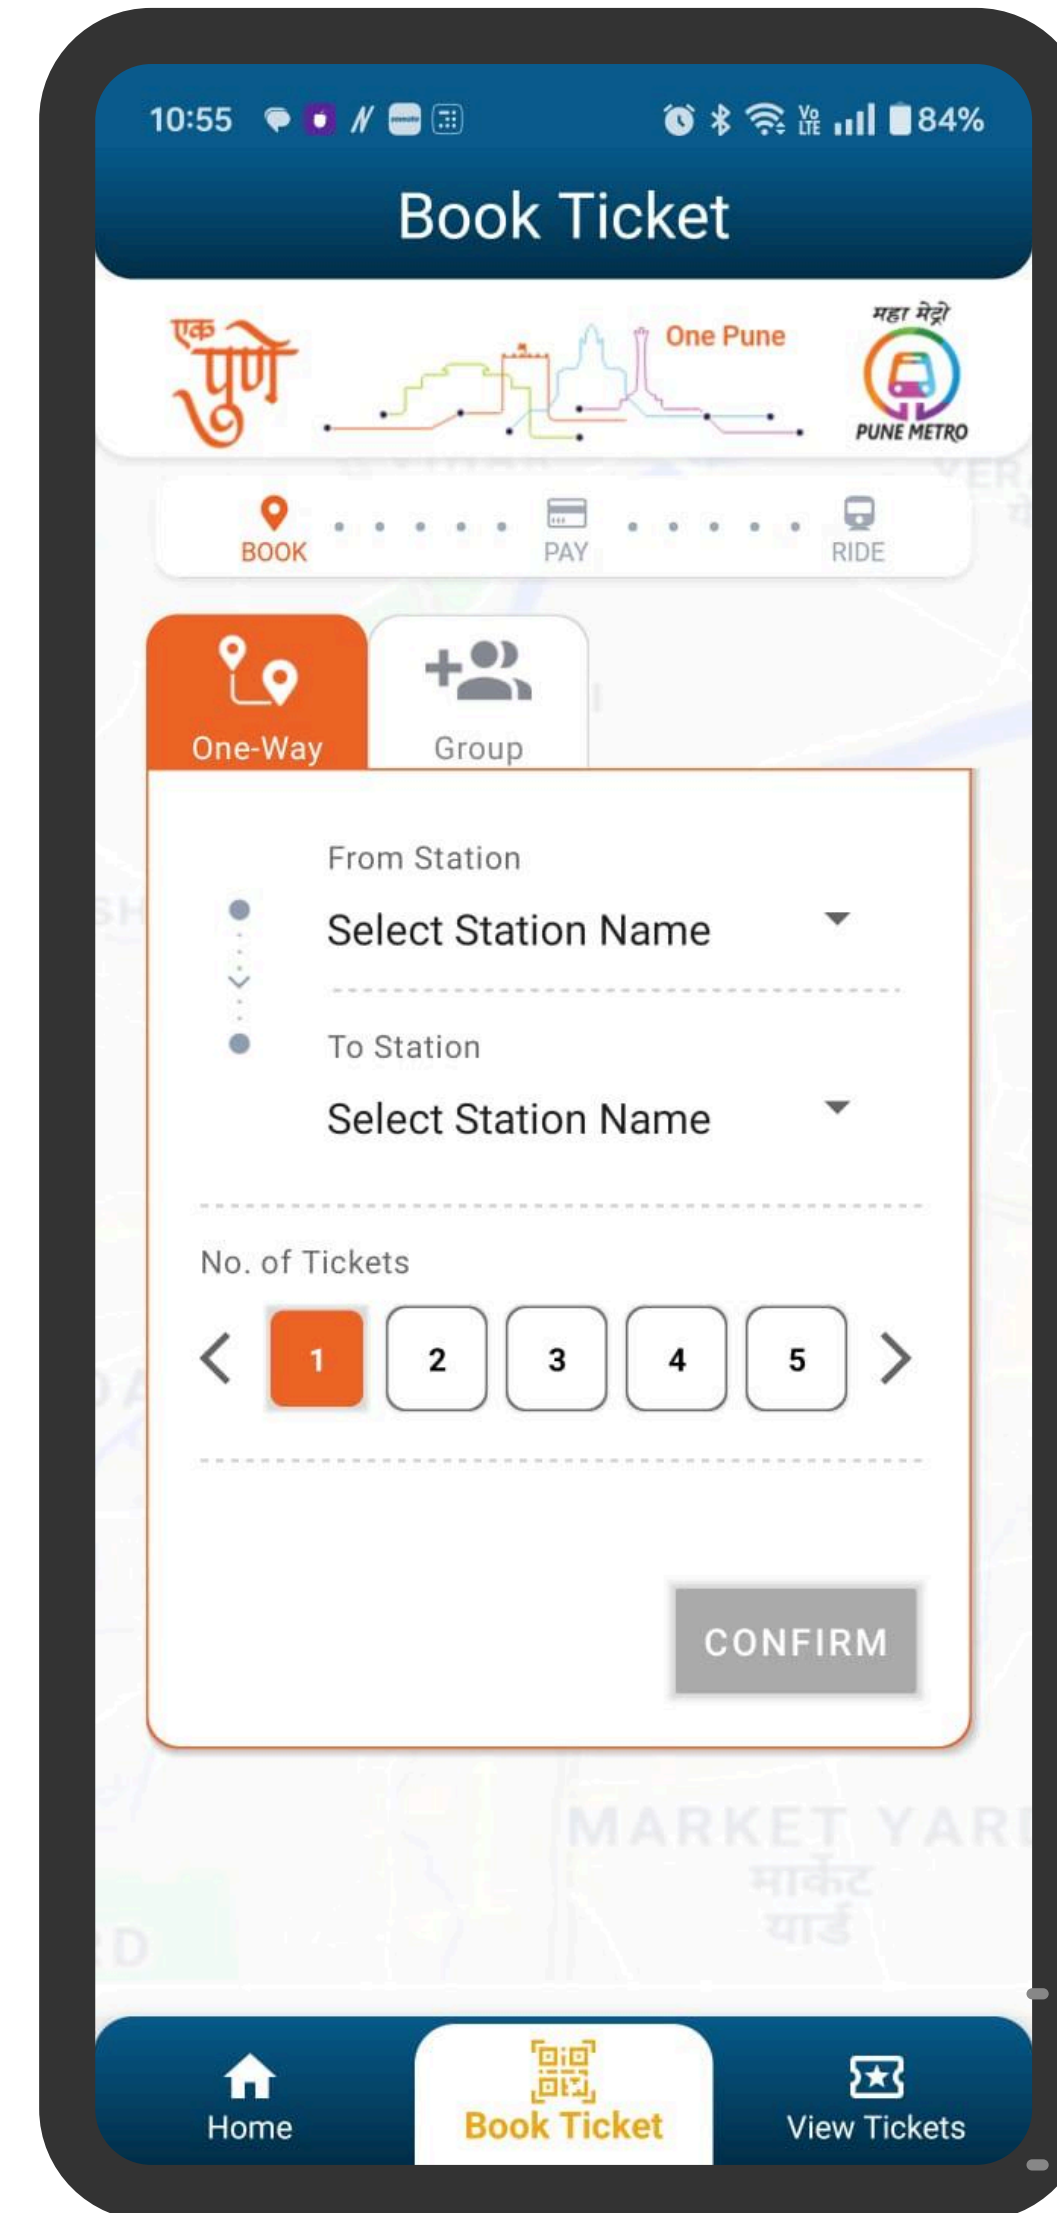

*Based on user interview

Looks like a button

Too many options!!
No hierarchy

Confusing navigation bar

What is the need?

- Need for a clearer and more intuitive interface.
- Demand for faster, real-time updates and information.
- Urgency to eliminate navigational confusion.
- Need to enhance accessibility and usability on the move.
- Desire to improve overall user satisfaction and travel efficiency.
- Want to make it more inclusive, youth-friendly, and future-ready.

What is the goal?

- Easy to use
- Enhance user experience
- Real time information
- Simplify ticket booking
